Dowsing for Healthy Buildings -David McAuley

Dowsing for Healthy Buildings

Using techniques from mental and vibrational dowsing, David will demonstrate how he employs protocols used in his building biology and architectural practice to create and improve places where we work, sleep and play

J. David McAuley Architect Inc. is a full service architecture firm, established in June 1978 in Drayton and re-located to Guelph for expansion in 1982. David's firm specializes in community related buildings including health care and wellness facilities, worship facilities, specialized housing including shelters and hostels and educational and recreational projects. With a holistic focus David encourages and supports the use of not just sustainable and environmentally friendly buildings products but also products that will not adversely affect the health of the building's occupants.
